STAR5000
Fetal Monitor

Features

● **Simple operation mode**
Simple mode design, 12.1" color TFT touch screen, easy for observation

● **Superior products performance**
Advanced ARM system, convenient for maintenance and upgrade

● **Excellent system function**
Adjustment of FHR, TOCO waveform, parameter color, FM measurement auto/manual, automatic fetal status scoring system, more clinical information for better decision

● **Powerful storage and replaying system**
120 hours all-parameter displaying, 1 hour audio-storage

● **Alarm system**
Intelligent 3-level audio/visual alarm, more accurate analysis

● **Networking system**
USB socket for software upgrade, ethernet socket supporting wire/wireless central monitoring for maximum 128 units

● **External printer**
Internal & external printer are available, improving quality & reducing cost
