

# PADECG Release Note

This is the release note for the PADECG. This document aims to introduce the main features of the new product so as to give you a general idea of them. For more detailed information, please refer to Edan's product catalog or contact Edan's salesperson directly.

## Perfect Solution for mobile use

### • Integrated solution

Edan's PADECG provides you a great mobile ECG solution by integrating sampling, analyzing, and editing into one modern-looking product. Based on the most popular Android OS, it is much easier to get familiar with compared to the traditional standalone ECG machine.

### • Great portability

Thanks to the compact design of current tablets and Edan's cleverish wireless sampling box, PADECG provides you great portability that you can hardly notice the weight on the go. It is perfect for ward rounds and home visiting.

### • Easy operation

Operating the product is just as simple as using your smart phone. You can acquire superb ECG traces with full confidence just within several touches. Convenient gestures such as long pressing, un-pinching, and dragging are all supported to enable users a better experience.

### • Optimizing your tablet & Cost-saving

PADECG optimizes your tablet and helps you save costs by utilizing the built-in functions such as camera, which can be used as a barcode scanner during patient information inputting, and Wi-Fi connection, which allows you to download ECG worklist or to upload report for data management. These functions always cost you several hundred US Dollars as options for a standalone ECG machine.

### • Paperless workflow & Printing

PADECG regards your eco-friendly awareness as an honor and supports you to go paperless in an examination workflow. If you really have to print out a report, a handy Wi-Fi printing solution will fulfill it without any difficulties.

### • Compatible with your current android tablet

PADECG is designed to be compatible with most android tablets no less than 7" and have a minimum resolution of 1024\*600 (WSVGA). You can take advantage of existing android tablets on your hand to avoid extra cost of purchasing a new one.

## What are included in the package?

1. A Disc containing the PADECG installation APK file
2. Wireless sampling box with Banana connector ECG cable with Snap style as optional
3. A set of limb clamps and a set of chest bulbs
4. Carry case and other accessories
