

Eko DUO

The cardiac examination system in your pocket

Eko DUO ECG + Digital Stethoscope

DUO is the first cardiac examination system in your pocket used to detect early signs of heart disease, such as valvular disease and atrial fibrillation*, and facilitate timely and personalized care for patients in and out of the clinic.

Single-lead ECG

Digital stethoscope

1-tap pairing
with Eko software

32X
Sound
amplification

Versatile listening
capabilities

FDA-cleared,
CE-marked

*When used in conjunction with Eko software.

Purpose-built for Telehealth

One-tap pairing with FDA-cleared, HIPAA-compliant software lets you easily synchronously connect patients and physicians with remote specialists.

Save commute time
for providers and patients

Keep tabs on
high-acuity patients

Closer monitoring
before and after procedures

Compact

Professional-grade ECG and amplified heart sounds consolidated in a portable package.

- Unobtrusive form factor
- No wires or adhesives
- Ideal for health care professionals that need to be mobile

Versatile

2-in-1 functionality ready for any physical or virtual setting.

- 1-tap pairing for wireless workflow
- Listen with the audio device of choice
- Switch between a stethoscope or ECG in seconds or use both simultaneously

Immediate

No more waiting for tests. Spot check your patient's heart rhythm while performing auscultation.

- Unique electromechanical view of patients' cardiac health from a single encounter
- Real-time viewing of ECG tracings and phonocardiogram (PCG) waveforms
- Ensure a deeper understanding before ordering tests or referrals
